

laso Love is one of many products by Total Life Changes. Total Life Changes creates products that are geared toward providing health and wellness in all areas of your life.

For too many women, we don't like to talk about the many changes that our bodies go through as we age or that can be brought about by health concerns including medications.

As we age we naturally experience hormonal changes that can effect our sexual performance and/or libido. Lack of desire or performance at any age can be attributed to stress, health, and any other number of factors.

If you're a mom and need more energy for your loving man or a baby boomer who is still enjoying romance in your life, you'll find that laso Love by Total Life Changes is known to restore performance, sensation, arousal, and desire naturally with no secondary side effects.

This is a subject that many women just don't want to talk about but can effect our self-esteem, confidence, and our most important and intimate relationships.
